Education Resource Group proudly presents:

## Laney Sammons

### *Guided Math: Meeting the Diverse Needs of Students*

The Common Core Standards require students to develop deeper understandings of math concepts and flexibility in applying a variety of methods to solve complex math tasks. Making this happen in a room full of diverse learners is a challenge, so ERG has partnered with Laney Sammons to support teachers in implementing small group math instruction.

Guided math has a number of benefits:

- Flexible instructional format
- Differentiation for all learners
- Development of conceptual understanding
- Problem solving ability
- Computational fluency
- Authentic tasks

*We are excited about learning from the expert who developed the guided math format and hope you can join us!*

## About Laney Sammons

Laney Sammons has authored numerous books on mathematics education. Her most popular text, *Guided Math: A Framework for Mathematics Instruction*, has helped teachers across the country meet the diverse needs of their learners. Laney has taught all levels of learners, ranging from elementary to college level and has also worked as an instructional coach to help districts implement the guided math framework. Her framework created amazing results—both the number of students meeting and exceeding standards increased. ERG is delighted to offer educators the opportunity to learn from Laney.

**Mail or fax the attached registration form with payment to Education Resource Group.**

942 West Fourth St, Winston-Salem, NC 27101, Fax: (336) 725-8143
